Skills & Interests

Technical Skills

Skill	Proficiency	Notes
HTML & CSS	Advanced	Used in multiple web development projects
JavaScript	Intermediate	Interactive UI development and logic
Python	Intermediate	For scripting, automation, and basic backend tasks
SQL	Intermediate	Designing and querying databases
PHP	Basic	Used for simple backend logic and integration
Git & GitHub	Proficient	Version control for group projects and personal repos
MySQL	Intermediate	Database design and normalization
React.js	Basic	Learning component-based frontend frameworks
Figma	Beginner	For wireframing and UX mockups

Soft Skills

- Strong verbal and written communication
- Problem-solving and critical thinking
- Teamwork and collaborative project development
- Time management and multitasking
- Adaptability and willingness to learn new tools

Interests

- Front-end web design and user experience (UX)
- Creating visually pleasing, functional web apps
- Exploring ethical and inclusive tech solutions
- Data visualization and user-friendly dashboards
- Tech that supports education, healthcare, or community development

My Learning Goals

- Improve JavaScript & modern frameworks (React or Vue)

- Learn REST APIs and back-end integration

- Build full-stack personal projects

- Explore DevOps tools (CI/CD, Docker basics)
